## Clocks and Chronos

- Mechanical 8 days Aircraft Chronographs Types B13, B15

## - Mechanical 8 days Aircraft Chronographs with integral revolving bezel, Types B17, B18

## General

SATHOM currently manufactures the largest selection of Aircraft Clocks and Chronographs. A high precision mechanical movement guarantees accuracy and reliability.

## Application

The mechanical 8 day Clocks are installed in civil and military aircraft. Users benefit from a high level of precision and reliability.

## Characteristics

## Operation

There is a standard 3 function (B13, B17) pushbutton operation of start/stop/ reset-to-zero in a fixed sequence. The other standard version (B15, B18) is the dual mode operating knob with a 2 -function push sequence start/stop and an independent fly-back-to-zero operation. The fly-back-to-zero is even possible while the counter is running.

Integral Revolving Bezel
The integral revolving bezel (B17, B18 only) is used as a second elapsed time function. Completely integrated in the case, the revolving bezel is set by a knob at the lower right hand corner, offering very smooth adjustment.

## Continuously-Running Second Hand

SATHOM offers an optional continuouslyrunning second hand that cannot be stopped, either by operation of the elapsed time function or by normal clocksetting. The Chronograph with continuously-running second hand can nevertheless be completely stopped for to the second synchronization with a time signal.

## Elapsed Time

The complete series of SATHOM AircraftChronographs are available with elapsed time ranges of 12 minutes, 60 minutes and 12 hours.

## Case

The Clocks and Chronographs are supplied in a Round case or in a semi-ARINC case.

## Lighting

Integral lighting is offered in different voltages and different colors. All instruments are available in NVG-compatible lighting.

Glass
All instruments with lighting are equipped with antireflective coated glass in compliance with MIL-C-14806.

## Electrical Connector

A 3-pin connector is used for all lighted Clocks and Chronographs. The standard connectors meet all the requirements of MIL-E-5400.

## Technical Data

## General

- Aircraft Chronograph
- Movement 3F

Movement 2F

- Number of Jewels
- Oscillations Per Hour
- Minimum Running Time
- Lighting NVIS Green
- Temperature

Operating
Non-Derangement

- Weight in Standard Configuration
- Colors White and Black
- Glass, Anti-Reflective Coated
